Transfer funds digitally and securely with Electronic Funds Transfers (EFTs)

We are committed to helping you feel confident in the management of your wealth, especially in times of uncertainty. We are pleased to offer a variety of e-services to help you to manage your wealth securely online, including Electronic Funds Transfers (EFTs).

EFTs are one-time transfers from your RBC Dominion Securities investment account to a Canadian bank account. By setting up EFTs on applicable accounts, we can easily transfer funds to ensure you have access to your money where you need it, when you need it.

For more information on EFTs, or to sign up, please contact us today.

To set up EFTs on your account, please provide us with the following:

- A completed fund transfer form (we can provide you with this form)
- A voided personalized cheque

Easy and safe set-up

For your convenience, you can simply take photos of the completed applicable form and your void cheque, and send them to us using secure two-way messaging through DS Online. We'll take it from there to initiate set-up, then let you know when you're good to go.
