Our approach

Understanding wealth as it matters to you.

Who do we do this for?

We help high-net-worth individuals, small business owners and their families focus on the things they can control and manage, rather than worry about, the things they cannot. Transitioning into retirement, succession planning and wealth protection are key areas of focus.

How do we get there?

We develop personal relationships, starting with a detailed converstaion to discover what is important in your life. We then come up with strategies and solutions to ensure focus is on key areas. Follow up is of critical importance to ensure we stay on track.

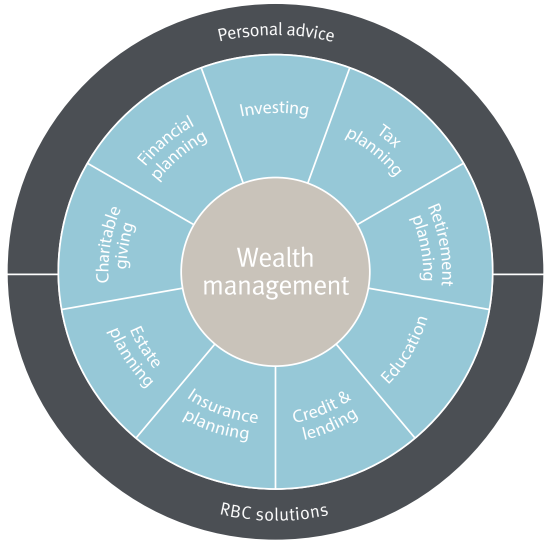
Why we do this

We love what we do. We get up each day looking forward to helping clients have more free time, sleep better at night and live the lives they've always wanted to live.

A comprehensive approach to wealth management

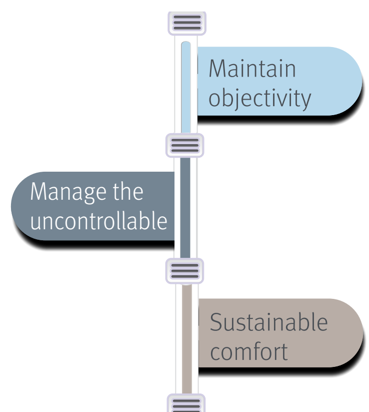
Your investment portfolio is just one key part of your overall wealth management plan.

To help you meet your various goals, we take a comprehensive approach that extends beyond investing to encompass lifestyle protection, retirement planning, intergenerational wealth transfer, legacy creation and more.



Our philosophy

We will continue to have bull and bear markets. We believe in the importance of consistent and enduring investment practices. These are the three rules that guide our investment decisions through all markets.



Our team and our firm

At RBC Dominion Securities, we have access to an extensive network of experts and specialists from across our firm and the globe.
