

March 22, 2023 was World Water Day! Two members from our team, Rossi & Pam spent time at Kalamalka Beach in Vernon, BC this day to help clean up the beach. In total, 40KG of trash was removed from the beach. You will see below the most found items we collected on the beach! “It was a pleasure for us to be able to make a difference on our local lake. Kal Lake means a lot to us both, we look at it everyday and enjoy it all summer long with our family and friends”.
