## DIVIDEND INCOME

### How various types of dividend income are taxed

This article provides an overview of the different types of dividend income and their respective income tax treatments for a resident of Canada. Certain tax treatments provide opportunities for financial planning strategies that may allow you or members of your family to receive Canadian dividend income “tax-free.”

*The information in this article is not intended to provide legal or tax advice. To ensure that your own circumstances have been properly considered and that action is taken based on the latest information available, you should obtain professional advice from a qualified tax advisor before acting on any of the information in this article.*

#### NOT ALL DIVIDENDS ARE THE SAME

Corporations can choose to pay dividends to shareholders. You, as the shareholder may receive dividends from different ‘pools’ of income within the corporation. The source of the dividend determines how you will be taxed on the income. Canadian corporations can pay both “eligible” and “non-eligible” dividends.

As a Canadian resident, the tax rate that applies to dividend income depends on the type of dividend you receive. For example, eligible dividends from a Canadian corporation benefit from preferential tax treatment. In comparison, dividends you receive from a foreign corporation are taxable at your marginal income tax rate.

#### DIVIDEND INCOME FROM CANADIAN CORPORATIONS

##### ELIGIBLE DIVIDENDS

Eligible dividends are subject to an enhanced dividend “gross-up”. Individuals who earn eligible dividends can claim a federal dividend tax credit. There is also a provincial or territorial dividend tax credit available, which differs for each province or territory. A list of gross-up factors and federal, provincial, and territorial dividend tax credit rates can be found in Appendix 1.

The following table provides an example of how tax would be calculated on \$1,000 of eligible dividends received by a taxpayer who is subject to tax at the top marginal tax bracket. The federal gross-up is 38%, the dividend tax credit is 15% of the grossed-up dividend. The example

assumes a federal tax rate of 29% and provincial tax rate of 15%. The provincial tax credit is 10% on the grossed-up dividend.

##### Example 1: After-tax eligible dividend income

Eligible dividend income	\$1,000
Gross-up (38%)	380
Taxable amount	\$1,380
Federal tax (\$1,380 x 29%)	\$ 400
Less: dividend tax credit (\$1,380 x 15%)	(207)
Net federal tax	\$ 193
Provincial tax (\$1,380 x 15%)	\$ 207
Less: provincial dividend tax credit (\$1,380 x 10%)	(138)
Net provincial tax	\$ 69
Combined tax (\$193 + \$69)	\$ 262
<b>After-tax amount (\$1,000 - \$262)</b>	<b>\$ 738</b>

RBC Wealth Management

Having little or no other income, you may be able to receive dividends from a Canadian corporation “tax-free.” Under certain circumstances, the dividend tax credit and the basic personal amount (and other tax credits you may be entitled to) reduce the taxes on dividends to zero.

#### NON-ELIGIBLE DIVIDENDS

Non-eligible dividends are subject to a dividend gross-up that is smaller than the eligible dividends. The dividend tax credit for non-eligible dividends is also generally smaller. As with eligible dividend, you are eligible for additional provincial or territorial dividend tax credit. A list of gross-up factors and federal, provincial, and territorial dividend tax credit rates can be found in Appendix 1.

#### COMPARING ELIGIBLE AND NON-ELIGIBLE DIVIDENDS

Generally, the company can designate a dividend as either eligible or non-eligible dividend. The ability to make such a designation depends mostly on a corporation’s status. Since 2006, dividends paid by a Canadian public corporation (companies that trade on a stock exchange) are typically classified as eligible dividends.

On the other hand, a Canadian Controlled Private Corporation (CCPC) can pay both eligible and non-eligible dividends. The first \$500,000 of active business income earned by a CCPC may be taxed at lower rates when certain conditions are met. The \$500,000 is the federal small business deduction (SBD) limit (the provincial limit varies by province). When dividends are paid from income that has been subject to the SBD, the dividends are designated as non-eligible dividends. A CCPC’s active business income exceeding the SBD limit is taxed at the higher general corporate tax rate. Dividends paid from this pool of income are designated as eligible dividends. A CCPC may also pay shareholders the eligible dividends it receives from other corporations.

#### TAX-FREE DIVIDEND INCOME

Having little or no other income, you may be able to receive dividends from a Canadian corporation “tax-free.” Under certain circumstances, the dividend tax credit and the basic personal amount (and other tax credits you may be entitled to) reduce the taxes on dividends to zero. In this case, although you receive dividends, the payment does not trigger an income tax liability. The amount of this potentially tax-free receipt depends on whether the dividend is an eligible or non-eligible dividend and on the province or territory of residence. See Appendix 2 for the amount of eligible and non-eligible dividend amounts a single Canadian resident may be able to receive tax-free assuming they have no other income.

Please note this planning opportunity is only applicable for individuals. If a trust or a corporation receives dividend income, the income is subject to tax in a different manner. They do not necessarily have the same tax credits. For example, although a trust is eligible for the dividend tax credit, it cannot claim the basic personal exemption.

#### THE EFFECT OF RECEIVING DIVIDEND INCOME ON INCOME-TESTED CREDITS AND BENEFITS

The more dividends you receive, the higher your taxable income. It is important to keep in mind the gross-up rate on dividends will increase your taxable income. For example, \$1 of actual eligible dividend is reported as \$1.38 taxable income on your tax return. The grossed-up amount is used for testing your eligibility for certain credits and benefits such as the age amount or Old Age Security. You should contact a

qualified tax advisor to determine the most tax-efficient amount of dividend income you should receive.

#### **DON'T FORGET THE ATTRIBUTION RULES**

If you gift shares to a spouse or a minor child, or your minor child receives shares from a relative, the income might be subject to the attribution rules.

If these rules apply, all of the dividends will be taxable in the hands of the individual who gifted the shares. If the individual who gifted the shares has other sources of income, the dividend income may not be tax-free for them.

#### **SPLIT INCOME TAX (KIDDIE TAX)**

The split income tax rules prevent families from shifting income to minor children as a way of reducing the household tax bill. Where a minor child receives dividends paid from private corporations or through a family trust, the dividends may be taxable to the child at the highest marginal tax rate. The minor child will only be able to claim the dividend tax credit on these payments. These rules do not apply to dividends that a minor receives from stocks that are traded on a public exchange. It is important to consult with your tax professional prior to implementing any income splitting strategies with minor children.

#### **FOREIGN DIVIDENDS**

Foreign corporations are generally not subject to Canadian corporate tax, so

dividends you receive from foreign corporations are not subject to the gross-up, nor are you eligible for the dividend tax credit. Foreign dividends you receive, such as those paid by U.S. or European companies, are fully taxable to you. This tax treatment results in higher taxes payable on a foreign dividend than on a Canadian-source dividend. In addition, there may be withholding tax on the foreign dividends. In a non-registered account, you can claim a federal foreign tax credit to a maximum of 15% on your Canadian income tax return. If the withholding tax rate is more than 15%, you may not be able to avoid double tax on the income.

If you hold shares of a foreign corporation, you may receive foreign dividends (stock dividends) as a result of a foreign spin-off. Normally, if you receive this type of dividend, it is fully taxable to you. However, the foreign corporation may be able to structure the spin-off as an "eligible spin-off". If the company gets approval from the CRA, you can then file an election with your tax return to defer the taxes payable on the foreign dividend. For more information, ask your RBC advisor for a copy of article titled "Foreign Spin-offs".

#### **CAPITAL GAINS DIVIDENDS**

Capital gains dividends are usually paid by regulated mutual fund corporations,

investment corporations or mortgage investment corporations. They are distributions from the corporation's pool of realized capital gains. Capital gains dividends are not eligible dividends for tax purposes, and do not qualify for the dividend tax credit. They are taxed as capital gains and are subject to tax like any other capital gain. Currently, you must include half of the capital gains you realize or receive in your taxable income.

#### **CAPITAL DIVIDENDS**

A capital dividend is a tax-free dividend that can be paid by a private Canadian corporation. When the corporation has a positive balance in the Capital Dividend Account (CDA), a capital dividend distribution can be made. In general, the following items increase a corporation's CDA:

- the non-taxable portion of capital gains net of the non-taxable portion of capital losses;
- proceeds from certain life insurance policies net of the adjusted cost base of the policy;
- capital dividends received by the corporation; and
- the non-taxable portion of any gains on the sale of eligible capital property, such as goodwill that is added to the account after the end of the tax year when the gain is realized.

Foreign dividends you receive, such as those paid by U.S. or European companies, are fully taxable to you. This tax treatment results in higher taxes payable on a foreign dividend than on a Canadian-source dividend. In addition, there may be withholding tax on the foreign dividends.

## STOCK DIVIDENDS

Stock dividends are typically used by public companies. They can be used to effect a stock split or increase the stated capital of the corporation. They are also sometimes used as a method to distribute shares of standalone businesses to shareholders as part of a spin-off transaction. When making a stock dividend distribution, the company does not need to go through the formal process that is generally required for cash dividend payments.

For tax purposes, stock dividends are taxable. In general, the taxable dividend amount equals the increase in paid-up capital of the corporation. In most cases this amount is negligible

and will not be reported on a T5 slip. A stock dividend distribution from a Canadian corporation is subject to the gross-up and dividend tax credit treatment. Foreign stock dividends will not be subject to the gross-up and accordingly are not eligible for the preferential dividend treatment. Again they are fully taxable.

*Understanding how you will be taxed on the various types of dividend income you may receive will help you with tax planning and investment planning. Speak to your RBC advisor to ensure that your current investments fit into your personal financial plan.*

## Appendix 1 – 2014 Gross-up Factors and Dividend Tax Credits

### Gross-up Factors

Eligible Dividends	38%
Non-eligible Dividends	18%

### Dividend Tax Credits (combined)

	Eligible Dividend Tax Credit	Non-Eligible Dividend Tax Credit
Federal	15.02%	11.02%
Alberta	25.02%	14.12%
British Columbia	25.02%	13.61%
Manitoba	23.02%	11.85%
New Brunswick	27.02%	16.32%
NL & Labrador	23.22%	15.57%
Nova Scotia	23.87%	16.89%
Nunavut	20.53%	14.07%
NWT	26.52%	17.02%
Ontario	25.02%	15.52%
PEI	25.52%	14.22%
Quebec	26.92%	18.07%
Saskatchewan	26.02%	14.42%
Yukon	30.10%	15.05%

The dividend tax credits above are a percentage of the grossed-up dividend.

A stock dividend distribution from a Canadian corporation is subject to the gross-up and dividend tax credit treatment.

## Appendix 2 – Tax-free Dividends

The following table summarizes by province the actual eligible and non-eligible dividend amounts a single Canadian resident may receive tax-free **assuming they have no other income**. These are the actual amounts of the Canadian-source dividends before they are grossed up.

Province	Eligible dividend amount (actual dividend before the gross-up)	Non-eligible dividend amount (actual dividend before the gross-up)
British Columbia	\$49,290	\$17,150
Alberta	\$49,290	\$21,852
Saskatchewan	\$49,290	\$18,867
Manitoba	\$24,280	\$8,389
Ontario	\$49,290	\$35,557
Quebec	\$35,080	\$21,400
New Brunswick	\$49,290	\$17,750
Nova Scotia	\$30,515	\$21,672
Prince Edward Island	\$44,692	\$9,700
Newfoundland and Labrador	\$38,845	\$17,782
Yukon	\$49,290	\$22,090
Northwest Territories	\$49,290	\$35,557
Nunavut	\$49,290	\$35,557

This table considers all regular federal and provincial taxes and surtaxes (with the exception of the Ontario Health Premium, and the Quebec Health Service Fund, Health Contribution and Prescription Drug Insurance Plan). Only the basic personal exemption and the dividend tax credit are reflected in the calculation.

As you can see from this table, the amount of eligible dividends that may be received tax-free varies from province to province. It ranges from the lowest amount of \$24,280 in Manitoba to the highest amount of \$49,290 in most other provinces. The dividend tax credit and the basic personal exemption in some provinces allow for a higher dividend amount that can be received tax-free.
