How to Find Out your RSP or TFSA Contribution Room

Contribution Room - Important Information

If you are checking your contribution room from January to March the CRA will not be up to date for the previous year's contributions.

Therefore if you have made contributions or withdrawals in the current or previous calendar year you may need to adjust for these until your financial institution has reported these details.

You should compare the TFSA transaction information we have with your own records to ensure that the information we have on record is correct.
